

HSK-C-Gr.5

The technical drawing shows a cross-section of a mechanical component. At the top, a callout specifies "HSK-C-Gr.50". The overall height is indicated as Ø125. A vertical dimension of Ø80 is shown from the bottom reference line to the top of a feature on the left. On the left side, there is a stepped bore with a shoulder at height 80. The distance from the bottom reference line to the top of this shoulder is 122. The distance between the shoulders of the stepped bore is 35. To the right of the stepped bore, there is a central hole with a diameter of Ø9. The distance from the bottom reference line to the center of this hole is 161. The total width of the main body is 228. The total length of the part, indicated by a horizontal dimension line at the bottom, is ca. 419. On the far right, another horizontal dimension line indicates a total length of ca. 672.

Motor 2.2KW ca. 3000U/m

A technical drawing of a mechanical part, likely a base plate or housing, shown in a top-down view. The part has a central circular feature with two concentric rings. The outer ring has a diameter of 200 mm. The inner ring has a diameter of 140 mm. A horizontal slot with a width of 120 mm is located at the bottom. The total height of the part is approximately 434 mm, divided into segments of 364 mm, 395 mm, and 63 mm. There are two small holes near the top center, and a vertical slot with a width of 126 mm is located on the right side.
