

HAGEN & GOEBEL

Werkzeugmaschinen GmbH

Key Drawer, 0 - 35mm

The key drawer is a precision tool.

Keys from 0 to 35 mm in width are drawn in the simplest manner without damaging shaft or key.

Instructions for use:

The jaws are first opened to the width of the key by turning hand wheel 1.

By turning hand wheel 2 the jaws are then moved downwards.

The key is fixed by means of wheel 1. When the key is held fast in the two jaws, hand wheel 2 is slowly turned and the key brought to the top without difficulty.

Trials with the new implement will convince you, too, of the excellent properties of the key drawer.
